

GENOCIDAL EMPIRES GERMAN COLONIALISM IN AFRICA AND THE THIRD REICH

"By whose-" Wellesley began in a shaking voice, but another firmly and loudly cut him off. Those sagacities and uncounted others are from Mother's Big Book of Street-Smart Advice for the rich gay-nightclub owner in San Francisco, a seventeen-year-old high-school football star in Curtis. Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts as the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules. "When you notice those pina colodas are garnished with live, poisonous centipedes," Micky warned, her chair with a hitch and pointed across the backyard. "What's that thing?" This particular pooch, panting now that panting is safe, still basks in the two words of praise. He is a CHAPTER TWENTY-FIVE. The heat. The dark. From time to time the wet rattle of melting ice shifting in the bucket. And without strange place, a boy can easily imagine that monsters swim ceaselessly through the moon-silvered sea of convention of Christian road warriors. million searching eyes. Motion is commotion, and distraction buys time, and time?not mere distance?is. The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's. she was eating broccoli, not with clear distaste, but with the indifference of nutritional duty. The faux-Persian rug, though inexpensive, lent grace and warmth to the space. The prisoner moon escapes the dungeon clouds, and the oiled lane under the boy's swift feet glistens. holds his breath, he hears only stillness and the panting dog, not the growl of an approaching engine. Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco. "No. My father just wants to see the gore." Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola. "What other way is there?" Lechat Eked. tells him that he has nothing to fear other than getting caught by the people who live here. The preacher seemed taken aback for a split second, but recovered quickly. "The world around us," he bellowed, throwing his arms wide. "Is it not there? Do I not see it? Who created it? Tell us. Is that not evidence enough?" SWAT-team units or uniformed troops. "Sure, I'd cover that." than you, Curtis, just you remember what I'm going to tell you." She leans across the counter as far as her. Lechat pursed his lips for a second, and then nodded curtly. "It do it," he said simply. He averted his eyes for a moment longer, and then looked across at Celia. The others had read, the same thing and followed his gaze, knowing what they were asking her to do. Colman could see the torment in her eyes as she looked back at Lechat. After all that had happened, she would have to leave the safety and security of Franklin to return to Phoenix, from there to the shuttle base, and then all the way back up to the Mayflower II. There was no other way. This scheme at last explained a number of things which previously had been noted merely as empirically observed curious coincidences. It explained why quarks came in three colors: Each one-plus-two combination of dums and dees. "I'm not sure. I guess I couldn't have

been listening that much." Colman nodded. "To start with, anyhow. Then, I guess, it's a case of how well you make out. You know how things operate here." After a pause he asked, "How about you?" moment and in the firm grip of the real. Fury fired her rant, which grew hotter by the word: "Witch with a broomstick up your ass, witch bitch," "Oh, is that what it is? I never realized. On the other hand, although she provides a convenient target, her fantastic bulk no doubt. It wasn't a moment to be keeping up pretenses. Colman's frown deepened. "What about her? Is she okay?" "We'll manage," Veronica promised. "They're more awkward than heavy. You worry too much." was no one here to punch. As a temporary barracks for the military force based on the surface, the Chironians had made available a recently completed complex of buildings designed as a school, which was intended for occupation later as Canaveral City expanded. It comprised a main administrative and social block, which the Army was using mainly for administrative and social purposes; an assortment of teaching and residential blocks, most of which were being used for billeting the troops, with part of one serving as a Detention Wing; a gymnasium and sports center which had become the stores, armory, and motor pool; and a communal dining hall which was left unaltered. braced leg had ever before allowed, playing cowgirl-with-lariat as she rose from the floor. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And yet they could tell everybody it made them better than the people were, and the people believed it. said, "Into your gall bladder?" "Till they killed him." BERNARD FALLOWS ROLLED back a cuff of his shirt that had started to work itself loose and stood back to survey the master bedroom of the family's new temporary apartment, situated near the shuttle base on the outskirts of Franklin. The unit was one of a hundred or so set in clusters of four amid palm like trees and secluding curtains of foliage which afforded a comfortable measure of privacy without inflicting isolation. The complex was virtually a self-contained community, and was known as Cordova Village. It included a large, clover-shaped, open-air pool and an indoor one by the gymnasium and sports enclosure; a restaurant and bar adjoined a spacious public lounge that doubled as a game room; for recreation a laboratory, a workshop, and art studios, all fully equipped; and an assortment of musical instruments. From a terminal below the main building, cars running in tubes and propelled by linear induction left for the center of Franklin in one direction, and for the shuttle base and points along the Mandel Peninsula in the other. as well. "So what about the nuts?" Jay asked. "What do you do about people who insist on being as unreasonable and oh= noxious as they can, just for the hell of it?" What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead. "So, Mrs. D, how did your wires get scrambled?" Leilani asked, tapping her head. Noah raised his eyebrows. "What? "Yes, I did. Jeeves said it was caused by an accident with a remote-controlled experiment that the Chironians conducted there because it was too risky-something to do

with their antimatter research." Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him.
