She reached behind her and steadied herself on the door. Several people at the back stood up and started clapping. The applause spread and turned into a standing ovation. Congreve grinned unabashedly to acknowledge the enthusiasm, stood for a while as the applause continued, and then grasped the sides of the podium again..Conversation was tense and ragged at first until Lorraine got off on her "career" and kept us entertained. plastic, which was thick enough to make an impenetrable barrier. "Developments in genetic engineering and embryology make it possible to store human genetic information in electronic form in the ship's computers. For a small penalty in space and weight requirements, the ship's inventory could be expanded to include everything necessary to create and nurture a first generation of, perhaps, several hundred fully human embryos once a world is found which meets the requirements of the preliminary surface and atmospheric tests. They could be raised and tended by special-purpose robots that would have available to them as much of the knowledge and history of our culture as can be programmed into the ship's computers. All the resources needed to set up and support an advanced society would come from the planet itself. Thus, while the first generation was being raised through infancy in orbit, other machines would establish metals- and materials-processing facilities, manufacturing plants, farms, transportation systems, and bases suitable for occupation. Within a few generations a thriving colony could be expected to have established itself, and regardless of what happens here the human race would have survived. The appeal of this approach is that, if the commitment was made now, the changes involved could be worked into the existing schedule for SP3, and launch could still take place in five years as projected.'..but nonetheless jealous and possessive husband, who was a patent attorney employed by Dupont in..Westland stood there with his lower jaw down around his ankles watching Venerate polish off the..through seven. "Then I am the prince to save you," said Jack..On Christmas Eve, feeling sad and sentimental, he got out the old cassettes he and Debra had made on their honeymoon. He played them on the TV, one after the other, all through the night, waring mellower and mellower and wishing she were here. Then, hi February, when the world had once again refused to end, she did come home, and for several days it was just as good as anything on the cassettes. They even, for a wonder, talked to each other. He told her about his various encounters in pursuit of his endorsements, and she told him about the Grand Canyon, which had taken over from the end of the world as her highest mythic priority. She loved the Grand Canyon with a surpassing love and wanted Barry to leave his job and go with her to live right beside it Impossible, he declared. He'd worked eight years at Citibank and accrued important benefits. He accused her of concealing something. Was there some reason beyond the Grand Canyon for her wanting to move to Arizona? She insisted it was strictly the Grand Canyon, that from the first moment she'd seen it she'd forgotten all about Armageddon, the Number of the Beast, and -all the other accoutennments of the Apocalypse. She couldn't explain: he would have to see it himself. By the time he'd finally agreed to go there on his next vacation, they had been talking, steadily, for three hours!. Amanda recoiled..Selene laughed. She spun across the sand in time to some music only she could hear and grinned broadly. "Poor Vestal Virgin. How shocking to be confronted with the possibility the temple of her body has been defiled."..During the week of September 23, seven thousand Ozos were shipped to domestic and Canadian addresses supplied by Smith: five hundred to electronics manufacturers and suppliers, six thousand, thirty to a carton, marked "On

Consignment," to TV outlets in major cities, and the rest to private citizens chosen at random. The instruction booklets were in sealed envelopes packed with each device. I wondered what Selene would have to say about the."I won't I can't bear it." Amanda screamed once more as the knife dropped from her fingers..formless doubts..Over their orange juices Columbine told Barry a long and very unhappy story about her estranged but nonetheless jealous and possessive husband, who was a patent attorney employed by Dupont in Wilmington, Delaware. Their marital difficulties were complex, but the chief one was a simple shortage of togetherness, since his job kept him in Wilmington and hers kept her in New York. Additionally, her husband's ideal of conversation was very divergent from her own. He enjoyed talking about money, sports, and politics with other men and bottled up all his deeper feelings. She was introspective, outgoing, and warmhearted..Amos and the well-muffled sailor climbed down onto the rocks that the sun had stained red, and started toward the slope of the mountain. Once the grey man raised his glasses as he watched them go but lowered them quickly, for it was the most golden hour of the sunset then. The sun sank, and he could not see them anymore. Even so, he stood at the rail a long time till a sound in the darkness roused him from his reverie: Blmvghm!.With the tip of his thin grey sword he cut Amos' ropes, thrusting him into the jewel garden and closing."No, just said he was restless and wanted to be movin' on. Only a handful, of course, are directly based on Mary Shelley's novel itself; of these, only one besides the great classic of 1931 is worth mentioning. That is Frankenstein: The True Story. Coscripted by Christopher Isherwood, it takes enough liberties to almost qualify as a variation, but is wonderfully literate and contains."Why do I say what I think? He was the president of a company that bore his name and which held more than a hundred patents in the scientific instrument field. He was sixty, a widower. His only daughter and her husband had been killed in a plane crash in 1978. He had a partner who handled the business operations now; Smith spent most of his time in his own lab. In the spring of 1990 he was working on an image-intensification device that was puzzling because it was too good. He had it on his bench now, aimed at a deep shadow box across the room; at the back of the box was a card ruled with black, green, red and blue lines. The only source of illumination was a single ten-watt bulb hung behind the shadow box; the light reflected from the card did not even register on his meter, and yet the image in the screen of his device was sharp and bright When he varied the inputs to the components in a certain way, the bright image vanished and was replaced by shadows, like the ghost of another image. He had monitored every television channel, had shielded the device against radio frequencies, and the ghosts remained. Increasing the illumination did not make them clearer. They were vaguely rectilinear shapes without any coherent pattern. Occasionally a moving blur traveled slowly across them..waiting for her at Intensity Five. She never showed. By mid-February, he'd begun to be alarmed. Early..again. It's a little unfair to denigrate Hollywood and its offshoots for this; most of the arts have been doing."I'm standing here, trying to be friendly," said Amos. But when he stepped forward, the unicorn also stepped forward, and the grey man found the sharp point of the unicorn's horn against the grey cloth of his shirt, right where it covered his belly button..Robert F. Young has written thirty-nine stories for F&SF over the years, and we can think of only three writers who have contributed as much fiction as Mr. Young (Poul Andersen, A. W. Davidson, and Ron Goulart). A Robert Young story is always a pleasure because its high quality is as predictable as its subject matter is unpredictable. Here he gives us the real story behind why a certain tower in Babylon was never finished and why all great builders, from Nebuchadnezzar to Moses (Robert), have such a rough time.. "I thought you were dead too," said Billy Belay, "after you ran out of here with that thin grey man and his big black trunk. He told us terrible stories of the places he intended to go. And you just up and went with him without having heard anything but the reward." "India," Moises said, pronouncing the word with all the contempt of one in whose veins ran a ten per-cent admixture of the proud blood of the conquistadores, "Who are we to know the way of savages?" He shrugged..red and blue lines. The only source of illumination was a single ten-watt bulb hung behind the shadow.I backed away, throwing my arms up to protect my head. Amanda might not be athletic, but she had all her released emotion and Selene's sinewy gymnastic strength behind that swing.
