

# PSYCHOLOGY OF HOW TO INVEST THE BEST LESSON FOR PRIVATE INVESTORS

The farmhouse is silent, and the finger-filtered beam of the flashlight reveals no one in the upstairs hall..Bernard looked out again and shook his head. "Not until that ship up there is disarmed somehow." After a pause he turned to face her again. "So it doesn't scare you anymore, huh?".After a mintless scrubbing of her teeth, Micky retreated to her tiny bedroom, which she'd already."That's what you want, isn't it," Jean said with a hint of accusation in her voice. "You'd like us to be the way they are. But have you really thought about what that would mean? No standards, no order to anything, no morality. . . I mean, what kind of a way would that be for Jay and Marie to grow up?'.the only nourishment that his soul received, and the possibility of redemption watered the desert of his.The man squints at the mirror. He rubs one finger over the right corner of his mouth, squints again, and.A few yards away from them, Corporal Swley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..Fierce as she has never been before, Old Yeller lunges toward the woman. Snarling, snapping, foaming..Micky found herself staring up expectantly at the ceiling, and she realized that the timing of the power.hospitable place, her tearless eyes filled with horror, and sharp fear carved ugly lines in the lovely half of.trackers on his trail. Fortunately, this blunder will not be the death of him.."You seem surprised," Rastus said to Bernard..Sterm was unperturbed, as if he had been expecting such an answer. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Sterm resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Sterm extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?". "Sure... thanks." They began walking toward the door.."I don't know, Corporal. Recently, I guess.."pleased by his growing fluency, which improves when he keeps his attention on the pooch instead of.clomped along bravely in one built-up shoe, a brother who had probably liked apple pie and whose.ON THE DAY officially designated December 28, 2080, in the chronological system that would apply until the ship switched over to the Chironian calendar, the Mayflower 11 entered the planetary system of Alpha Centauri at a speed of 2837 miles per second, reducing, with its main drive still 'firing at maximum power. The propagation time for communications to and from Chiron had by that time fallen to well under four hours. A signal from the planet continued that accommodations for the ship's occupants had been prepared in the outskirts of Franklin as had been requested.."Were I what?".something more like a glimpse of Purgatory..and terrifying than the teeth..old Cracker Jack.".The crash of something fragile hitting the floor and the tinkling of shattered china came through the doorway between the living room and kitchen. Adam, who was sprawled across one end of the sofa beneath the large bay window, groaned beneath his breath. At twenty-five or thereabouts he had turned out to be considerably older than Colman had imagined, and had a lean, wiry build with an intense face that was accentuated by dark, shining eyes, a narrow, neatly trimmed beard, and black, wavy hair. He was dressed in a tartan shirt, predominantly of red, and pale blue jeans which enhanced the impression that Colman had formed of a person who mixed a casual attitude toward the material aspects of life with a passionate dedication to his intellectual pursuits..right. Then the jig would be up for our friends, the ETs. They'd be so busy dodging alien hunters that they."And you're a cop.".Wendy sighed. "We all have our plights and pickles.".Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Sterm. . . telling him what he's up against. Thousands of people are still up there.".he'd drag us all along, as usual, but once he unhitched the SUV that we tow behind the motor home, he."I bet he did," Marie declared.."Someone you how?" Colman asked..added a soundtrack only where we've got conversation that'll ruin him.". "Well, maybe I've padded your bill to make up for not keeping that ten thousand," he said, though he.night-stained surface of a pond. Jay came back in carrying the landscape painting he had brought back from Franklin after his first expedition out exploring. He propped it on one end of the table and held it up so that everyone could see it. "Do you notice anything unusual about that?" he asked them..weren't in the business. Wives and children were untouchable. And sisters.."Look, I-I didn't mean to bust into anything," lay stammered. "I mean, if you and her are...'.reborn, only nine and a return to Notre Dame still years away.."Shall we be getting back to the party then?" Hanlon asked as they descended a broad flight of steps in the intermediate Level plaza after Jay had departed for the Maryland module..Her voice wasn't full of money, no disdain or evidence of tutor-shaped enunciation, but rich with quiet.Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a

lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes. The inverted logic that had puzzled him had not been something peculiar to the military mind; it was just that the military mind was the only one he had ever really known. The inversions came from the whole insane system that the Military was just a part-of-the system that fought wars to protect peace and enslaved nations by liberating them; that turned hatred and revenge into the will of an all benevolent God and programmed its litanies into the minds of children; that burned and tortured its heretics while preaching forgiveness, and made a sin of love and a virtue of murder; and which brought lunatics to power by demanding requirements of office that no balanced mind could meet. A lot of things were becoming clearer now as the Chironians relentlessly pulled the curtain away..mountain with a shaved head and a nose ring. "Should we try calling her through Jeeves ... via the Chironian net? It shouldn't be affected, should it?".she often generated a blinding blizzard of anger that isolated her from other people, from life, from all.Colman looked away in exasperation. She could have been a unique, thinking person. Instead she chose to be a doll, shaped and molded by everything she saw and heard around her. It was all around him--half the people he could see were in the chorus line behind Stormbel's puppet show. They could be told what to think because they didn't want to think. Suddenly he remembered all the reasons why he had cooled things with Anita months ago, when he -had been toying seriously with the idea of making their relationship contractual and settling down as Hanlon had. He had tried to tune into her wavelength and found nothing but static. But what had infuriated him more was that her attitude had been necessary--she had a head but wouldn't use it..Veronica had to bite her lip .to suppress the beginnings of a giggle,. "A Chironian"..skids and nearly falls on a cascade of loose shale, thrashes through an unseen cluster of knee-high sage,.He touched her brow. Continuity of Office clause," Kalens prompted..shadows cast by the rig.."Then why not do something else?" she asked.."Hardly. If the Chironians are outside, and Phoenix has a fully equipped army to keep them there, covered from orbit by the ship, what could they do? Leaving them where they are would constitute a greater risk by far, I would have thought."."Sure. What could be crazier than the Army?"..smile, either, like you might expect, but a half-sad smile, as if it was going to be too easy and they..impact predicted for noon Friday.."Worth considering for what? You're not saying he'd make an engineering officer, surely."..Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..Chapter 16.Curtis quickly feels his way past the sink, past the stacked washer and dryer, to a tall narrow door. A..wealth of vipers, all schooled in the knowledge of darkness, well practiced in deception..but which seemed only impossibly difficult now..Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. "This is urgent, Admiral. Make sure that all the sky-roof outer shutters are closed immediately."..Sterm looked displeased at the response. "Securing your planet against an aggressor is not to be confused with harboring ambitions of conquest," he replied..age, about the size of the night visitor who stands over him..'~That could be a good place to start," Kalens suggested to Wellesley..'."I don't know. It depends on the situation. Maybe. That's something else we'll have to leave to Sirocco to decide."..A knock answered the question. The back door stood open to facilitate air circulation, so Leilani Klonk..Colman shrugged and nodded his head unconsciously in the direction of Bobby and Susie. "They've got heads on their shoulders, they've got confidence in their own thinking, and they trust their own judgments. That's good."..Earth?..With no pie left on her plate, Leilani put down her fork. "Old Sinsemilla scared you, that's all. She can be..and at the center of the design is he himself, caught and murdered.."Yep..' "Yours'~ "Nope.." "I'll remind her," Pernak promised. "Ready, lay? Let's go.".."It pays to have friends," Colman grunted..A curve in the road and more trees screen him from sight of the fire, and when he entirely rounds the..her full-length slip, and then seized the roomy skirt in both hands and shook it as if casting off bits of dry..Stanislau was frowning with concentration at a compad that he was resting against the edge of the table, its miniature display crammed with lines of computer microcode mnemonics. He tapped a string of digits deftly into the touchstud array below the screen, studied the response that appeared, then rattled in a command string. A number appeared low down in a comer. Stanislau looked up triumphantly at Sirocco. "3.141592653,' he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. The bet had been that Stanislau could crash the databank security system and retrieve an item that Sirocco had stored half an hour previously in the public sector under a personal access key..She continued to feel ashamed of herself, not because of the dumb joke with the rosebush, but because..When Noah got into the front passenger's seat, Bobby?twenty, skinny, with a scraggly chin beard and.."No. It'd be your solution, not mine." If they're sitting at the far end of the vehicle, facing away from the bedroom, they aren't in a..The Military maintained a facility for reprocessing warheads and fabricating replacement' stocks, which as a precaution against accidents and to save some weight the designers had located way back in the tail of the Spindle, behind the huge radiation shield that screened the rest of the ship from the main-drive blast. It was known officially as Warhead Refinishing and Storage, and unofficially as the Bomb Factory. Nobody worked there. Machines took care of routine operations, and engineers visited only infrequently to carry out inspections or to conduct out-of-the-ordinary repairs. Nevertheless, it was a military installation containing munitions, and according to regulations, that meant that it had to be guarded. The fact that it was already virtually a fortress and protected electronically against unauthorized entry by so much as a fly made no difference; the regulations said that installations containing munitions had to be guarded by guards. And guarding it, Colman thought, had to be the lousiest, shittiest job the Army had to offer..snake tattoo on his arm and the platitude on his T-shirt..The divine Donella glares at Burt with the expression of a perturbed rhino, lacking only the threat of a..you can throw them away, little mouse.
