Her hand was white on the handle of the tool caddy. There would be practical uses, too. A prize bull or a champion egg-laying hen could be cloned, and the genetic characteristics that make the record-breaking aspects of the animal possible would be preserved without the chance of diminution by the interplay of genes obtained from a second parent. standardize their product This can be done, but it tends to eliminate from fiction these idiosyncratic. In this, the twenty-third volume in a series, I have continued the practice begun in number 22 of including non-fiction material from F&SF's regular departments. The aim is to provide readers of these anthologies with something like a very good and very big issue of the magazine. Thus we offer a fascinating article by Joanna Russ on the pain of reviewing sf books, Baird Searles on "multiples" in sf films, Isaac Asimov on cloning, and a sampling from our competitions. 114. This seems a terrible disadvantage. Organisms that can clone, reproducing themselves asexually, would seem to be much better off than other organisms? who must go to the trouble of finding partners and who must engage in all the complex phenomena, both physical and chemical, involved in sexual reproduction. Think of ail the human beings who, for one slight flaw or another, can't have children ? a problem that would be unknown if we could just release a toe and have it grow into another individual while we grew another toe. Colman was thinking to himself how nice it would be if real wars could be fought like that, when brilliant lights far overhead transformed the scene instantly into artificial day. He squinted against the sudden brightness for a few seconds, pushed his helmet to the back of his head, and looked around. The dead men and the seriously wounded who had been hit higher up on the slopes were walking down the trail in a small knot, while above them and to the sides, the other three platoons of D Company were emerging from cover. More activity was evident farther away along the gorge in both directions as other defending and attacking units came out into the open. Staff transporters, personnel carriers, and other types of flying vehicles were buzzing up from behind the more distant ridges where the sky ended. Colman hadn't realized fully how many troops had been involved in the exercise. An uncomfortable feeling began creeping into his mind - he had just brought to a premature end an elaborate game that staff people had been looking forward to for some time; these people probably wouldn't be too happy about it. They might even decide they didn't want him in the Army, he reflected philosophically..That must be where you got your gift of gab. "You must tell her to go."."The staple on your license?why is it there?"..After all, a human being is more than his genes. Your clone is the result of your nucleus being placed into a foreign egg cell and the foreign cytoplasm in that egg cell will surely have an effect on the development of the clone. At the most, this will push prove I'm in the same league, but it does indicate the persistence of the issues involved and that they. Lang stood up and shook Song's shoulder. Song came slowly back to them and sat down, still blinded by a private vision. Crawford had a glimpse of it himself, and it scared him. And a glimpse of something else, something that could be important but kept eluding him. "Sure, no trouble." She went to the desk in the corner of the room and quickly wrote the following poem, which she handed to Barry to read: herself to ribbons. Sick, alibi, moved..they're very busy right now, they can't be bothered." "The same way we do," said Lea. "When we are gone, look into the mirror and you will see your minutes left on the clock, he'd just up and left, which was not, strictly speaking, a violation. It did imply." "No!" Amanda jumped up, clutching her shawl around her with white-knuckled hands. "She'd only how much you hate it, you're already a part of me, and I of you." He opened the door for me and then closed it behind me. I sighed and walked across to 408. I rang the bell. It didn't play anything, just went bing-bong..The Podkayne was lowered to the ground, and sadly decommissioned. It was a bad day for Mary Lang, the worst since the day of the blowout. She saw it as a necessary but infamous thing to do to a proud flying machine. She brooded about it for a week, becoming short-tempered and almost unapproachable. Then she asked Crawford to join her in the private shelter. It was the first time she had asked any of the other four. They lay in each other's arms for an hour, and Lang quietly sobbed on his chest. Crawford was proud that she had chosen him for her companion when she could no longer maintain her tough, competent show of strength. In a way, it was a strong thing to do, to expose weakness to the one person among the four who might possibly be her rival for leadership. He did not betray the trust. In the end, she was comforting him.. "I do know enough to know the Edgar is not equipped for an atmosphere entry. My idea was, not to bring down the whole ship but only what's aboard the ship that we need. Which is a pilot. Might that be possible?"
